Federal Communication Commission  
Authorization and Evaluation Division  
7435 Oakland Mills Road  
Columbia, Maryland 21046

Dear Sir or Madam:

Given that it is our customer's intent to bundle our product, part number 2875352, with other modules before sending the final retrofit kit to it's dealers, we have decided that the best place for the required FCC warnings is in our customer's installation manual. We have therefore instructed our customer to add the required wording to their installation manual.

Please find attached copies of our instructions to our customer.

Best Regards;

A handwritten signature in black ink that reads "Lawrence Harmon". The signature is fluid and cursive, with a slightly larger 'L' at the beginning.

**Subject:** Fwd: RFID kits

Steve,

I wanted to touch base with you regarding an additional FCC requirement that should be included with the instructions for the RFID kit. The following statement should be added following the paragraph in italics that we sent you on 9/29.

*Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.*

If you have any questions, please let me know.

Steve,

I have left a voice mail, but wanted to follow it up with an email. FCC testing has been completed and went well. One item that did come up is that the following statement should be included in the instructions for this.

*This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.*

We are shipping the three replacement controls with the resistor tomorrow. You should receive them on Friday and if you can please get us feedback regarding the performance by Monday, we need to start building parts.

Additionally, we need feedback regarding the harness today. Please confirm that the harnesses are acceptable. If you can also provide feedback regarding the key covers and the fit of the transponder.

Thanks,

Matt Nolan
