Re: FCC ID: SK9ACT1

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron, Inc., for evaluation of their model ACT1 for single modular approval certification under FCC Part 15.247.

The Itron ACT1 is an electricity metering module which includes a 902.4 MHz to 927.6 MHz transmitter as well as WiFi. The module operates on AC as well as DC voltage which is supplied by a host device.

The 902.4 MHz to 927.6 MHz transmitter mode and WiFi transmitter mode can operate simultaneously; therefore, radiated inter-modulation testing was performed for all combinations of simultaneous transmission and found to be in compliance.

The ACT1 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
