IC: 864G-AMI2

Dear Sir:

The following application is submitted on behalf of our client, Itron Electricity Metering Inc., for evaluation of model CVSOR for a Class II Permissive Change in accordance with Part 2 and 15 of the FCC rules and RSS-210 for Industry Canada.

The purpose of this application is to evaluate the Itron Electricity Metering Inc. model CVSOR as configured with an integrated Enfora L.P. GSM 0108 GPRS modem module. The Enfora GPRS modem module is a pre-approved module certified under FCC ID: MIVGSM0108, IC: 4160A-GSM0108 and was integrated into the Itron CVSOR electricity meter.

The characteristics likely affected by the combination of these devices were tested and provided in this application. Due to co-location and simultaneous transmission of multiple transmitters both RF exposure and radiated inter-modulation products were evaluated. No evidence of inter-modulation products were detected and the RF exposure exhibit is provided with this application.

Sincerely,

Kirby Munroe
Manager, Wireless Certifications
