Re: FCC ID: SK9AMI-3

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of SK9AMI-3 for a class II permissive change under FCC Part 15.247.

The difference between the previous certified AMI3 device is a new data rate (153.6 kbps) for the 900 MHz LAN radio. No modifications to the RF section, as previously reported, have been made with only minor software differences between the previously certified device. Therefore no updated internal or external photographs have been supplied.

The meter types/models affected are CN2SO, CN2SOD, C2SOD, and C2SO. For the purpose of this evaluation the C2SOD meter was evaluated as it provides the worst case test condition.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
