Re: FCC ID: SK9AMI-4

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model AMI4 for a class II permissive change under FCC Part 15.247. This permissive change is to address the addition of a new host device for the AMI4 limited modular approval.

The AMI4 module contains (2) transceivers which include (1) frequency hopping 900 MHz LAN radio and (1) 2.4 GHz Zigbee radios. This class II permissive change addresses the addition of a pole top host device.

Radiated emissions for both radios were evaluated in the final host configuration. For simultaneous transmission, the device was also evaluated for radiated inter-modulation products and found to be in compliance.

The AMI4 was found to be in compliance.

Sincerely,
