Re: FCC ID: SK9AMI-4

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model AMI4 for a class II permissive change under FCC Part 15.247. This class II permissive change addresses the addition of host meter types 3S, 4S, 9S(8S), 9/36S, 12S, 16S and 45S(5S) for the AMI4 limited modular approval.

The AMI4 module contains (2) transceivers which include (1) frequency hopping 900 MHz LAN radio and (1) 2.4 GHz Zigbee radios. Radiated emissions for both radios were evaluated in all final host configurations. For simultaneous transmission, the device was also evaluated for radiated inter-modulation products and found to be in compliance.

The label from the AMI4, FCC ID: SK9AMI-4, module is visible from the exterior of the host devices therefore label exhibits for the hosts are not provided in this filing.

The AMI4 was found to be in compliance.

Sincerely,
