Re: FCC ID: SK9AMI6

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model AMI6 for certification under FCC Part 15.247.

The AMI6 is a stand-alone module designed to be integrated into specific host devices. The AMI6 is a composite device which contains (2) transceivers. These include (1) frequency hopping 900 MHz LAN radio and (1) 2.4 GHz Zigbee radios each of which was evaluated separately to the corresponding rules and found to be in compliance. The AMI6 was evaluated in host devices representative of the final installation.

Both radios can transmit simultaneously therefore the device was also evaluated for radiated inter-modulation products and found to be in compliance.

Sincerely,
