Re: FCC ID: SK9ITR9002

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model ITR9002 for certification under FCC Part 15.247.

The Itron ITR9002 is a stand-alone transmitter module that operates in the 902 MHz to 928 MHz unlicensed band. The module operates on direct current voltage which is supplied by a host device. The changes made to this device from the original for this Class II Permissive Change include a filter added to the original board. The ITR9002 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.

Sam Wismer
