Re: FCC ID: SK9ITR9002

To Whom It May Concern:

The following application is submitted on behalf of our client, Itron Electricity Metering, Inc., for evaluation of their model ITR9002 for certification under FCC Part 15.247.

The Itron ITR9002 is a transmitter module that operates in the 902 MHz to 928 MHz unlicensed band. The module operates on direct current voltage which is supplied by a host device.

This permissive change is to add a new mode of operation which includes an extended frequency range, additional data rate, new channel separation and new number of hopping channels. There are no changes to the hardware or power settings. The ITR9002 was tested to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
