Subject: Re: FW: Equipment Class

Importance: High

Hi Dennis,

There have been other applications that have been label AMP for PCS repeaters. Since the unit, that was tested, is only to amplify weak signals and not to demodulate and re-transmit signals we assumed the correct equipment code was AMP. We also looked into previous approved applications, for PCS repeaters, that were also approved as AMP (FCC ID: BCR-RPT-MOR701). Let me know if this satisfies FCC inquiry.

Thanks,
Juan Martinez
