

operating instruction

I. Product presentation

This is a JMGO Bluetooth Remote Control, which can be used to control the set-top box/TV. It has infrared and Bluetooth and UWB functions. It can control the set-top box or TV through Bluetooth and infrared, and has voice input capability.

II. Appearance

IV. Technical parameters

Technical parameters including hardware and software

Product name	JMGO Bluetooth Remote Control
Product model	J06-8P2
Size of product	Bluetooth devices
Network protocols	BLE5.0
Cell	DC 3.7V

Product size	Length x width x height = 165mm(L)X40mm(W)X15.5mm (H)
Manufacturer	Shenzhen Xeme Communication Co., Ltd

The approval code is shown on the product nameplate

V. Usage

The following functions can be implemented

- (1) Infrared function: When the remote control is not connected to the TV by Bluetooth, the TV can be controlled through infrared
- (2) Bluetooth pairing operation: Turn on the Bluetooth switch of the TV, press the return and menu keys at the same time. After the LED starts to flash, release it. The LED stays on for 1s and then turns off, indicating that the Bluetooth pairing is successful
- (3) Voice input: The Bluetooth connection is normal. Turn on the TV network connection, press the voice button for a long time and speak near the remote control. After that, release the voice button. At this time, the TV can recognize the input command and carry out relevant search or operation.

Federal Communications Commission Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

Part 15.521 Technical requirements applicable to all UWB devices

- (a) UWB devices may not be employed for the operation of toys, Operation onboard an aircraft, a ship or a satellite is prohibited.
