FCC id: SMPCLIKAPAD-BASE

Overall Assessment Letter for Albert Hall Meetings Ltd Clikapad Basestation

The Clikapad Basestation and C27 Keypad is a meeting voting system.

I have reviewed the application and found it to be compliant. The following has been noted during the evaluation.

1: RF Evaluation

The transmitter is a mobile device and exempt from routine evaluation and is below the low threshold for MPE evaluation.

2: Block Diagram

The overall Block diagram did not show the oscillators. The 2 Schematics have been additionally uploaded into this exhibit. The Operational Description which identifies the oscillators has not been replicated in this exhibit as the circuit diagrams clearly show the oscillators.

3: Confidentiality

The client requested confidentiality in a letter. They have subsequently confirmed they wish to request standard/permanent confidentiality.

Yours sincerely

Hilton Carr
Task Manager, Certification and Technical Development
