Overall Assessment Letter for Albert Hall Meetings Ltd Clikapad CP27 Keypad

The Clikapad Basestation and CP27 Keypad is a meeting voting system.

I have reviewed the application and found it to be compliant. The following has been noted during the evaluation.

1: RF Evaluation

Although the Keypad is primarily hand held there is a reference to a Lanyard in the User manual. This has not been addressed further due to the low power of the device.

The transmitter is exempt from routine evaluation and is below the low threshold for SAR evaluation.

2: Block Diagram

The overall Block diagram did not show the oscillators. The 2 Schematics have been additionally uploaded into this exhibit. The Operational Description which identifies the oscillators has not been replicated in this exhibit as the circuit diagrams clearly show the oscillators.

3: Confidentiality

The client requested confidentiality in a letter. They have subsequently confirmed they wish to request standard/permanent confidentiality.

Yours sincerely

Hilton Carr
Task Manager, Certification and Technical Development
