**Overall Assessment Letter for Clikapad Superbase
FCC id: SMPSUPERBASE**

I have reviewed this application and find it compliant.

This is an original application for a low power device. The device is the Clikapad Superbase which is an audience response (voting) system base station.

Please note the following:

1: RF Evaluation

The transmitter is exempt from routine evaluation and is below the low threshold for SAR evaluation. I underwent the FCC RF exposure training with the FCC in October 2008.

2: Confidentiality

The client requested permanent confidentiality for an exhibit which was not permitted permanent confidentiality. They have subsequently supplied a new letter for confidentiality, requesting short-term confidentiality for the given exhibit.

3: Internal Photos

The originally supplied internal photos exhibit did not show a close-up view of the front PCB, giving a clear view of all of the board/components. An updated exhibit was subsequently supplied showing the necessary detail.

4: Test Report

The test report shows a space between the FCC ID grantee code portion and equipment product code portion. The test lab has confirmed this to be a typographical error.

Yours sincerely

Vina Kerai
Compliance Engineer
