Subject: Class II Permissive Change for FCC ID: **SNA-SFM11R2D** Grant Date: 11/19/2019

Dear Examiner,

This is to request a Class II Permissive Change for FCC ID: SNA-SFM11R2D with a Grant Date of 11/19/2019.

The change filed under this application reflect the use of a different antenna with matching circuit (matching components are part of antenna and no changes have been made to the module internally) replacing the original device antenna. No other changes were made to the radio from when it was tested under the original grant. Note the slight difference in the tested frequencies (from the original grant) was due to the choosing of the absolute limits specified in the radio spec, rather than the theoretical edge of the high and low channels. Also note that this device is locked via firmware to only operate in the 902.1375 - 904.6625MHz band and not the 920.1375 – 922.6625MHz band. This is because the 902.1375 – 904.6625MHz band is for US operation of Sigfox, whereas the 920.1375 – 922.6625MHz band is for Australia Sigfox.

If you have any questions regarding this application, please feel free to contact me.

Sincerely,

Dwayne Arrighy
Electronic Product Compliance Engineer
