

TURBORACER

Twist dome cover counter clockwise to open.
Slide battery cover/flasher out of controller.
Place two "AA" alkaline batteries into controller.

Use a screwdriver to detach the car from the battery cover and pedestal.

Replace the battery cover.

Place antenna into hole at the top of controller. Turn clockwise to secure antenna in controller.
DO NOT OVER-TIGHTEN. Pull tip of antenna to extend.

To charge the car, open cover at the bottom of controller. Align metal nodes on controller with the nodes on the car and place car onto controller. The charging indicator light will come on when car is charging. After a full charge the light will turn off. Take car off of controller.

The controller is full function now. To make the car go, push the forward or reverse button. The car will turn left and right when the left or right button is pushed. The car will only turn left and right when it is moving in forward or reverse direction. The control light 2 will come on when car is in use.

When indicator light becomes faint, it is time to replace batteries. Batteries should not be thrown away among other household waste. You can hand in your batteries at the official assembly center of your community or in any store that sells this kind of batteries.

While operating controller, make sure antenna is fully extended.

Occasionally the car will sway left or right while moving in forward or reverse direction. To correct this, adjust the directional guide on the bottom of car as shown in the

illustration below. This may need to be done a few times while operating the car.

For best results operate on a smooth and dry surface. Radio waves control this car and can easily be interrupted. Avoid using near phones, electrical lines. The supplier is not responsible for radio or TV interference caused by unauthorized modification of this equipment. Such modifications could void the users authority to operate the equipment.

Modifications on the product will void the users authority to operate the equipment.

In order to avoid damage and danger, the instructions above should be read carefully and be kept.
