Subject: Re: C&TT Co., Ltd., FCC ID: SR3WCS-211, Assessment NO.: AN04T4392, Notice#1

Dear Helen,

Here is answer of the issue.

Question #1 : The device belongs to hand - held device, three orthogonal axes investigation is necessary. Please verify whether such investigation has been made.

-> Attached please find "WCS-211 Test Report.doc"
The answer is page 6. We've attached "PRELIMINARY TESTS"

Question #2 : The user manual provided in this filing is very technical, including block diagram, circuit description, schematic, which is not intended to provide to the end user, however it provides very limit information as how to operate the device, how to make it work with the phone. Is any special receiver required to be installed into the phone? Please provide operating manual.

-> Attached please find "WCS-211 USER'S MANUAL.doc"
The answer is page 8(HOW TO OPERATION).

Question #3 : Please provide the information of the associated receiver, please confirm it is FCC certified or under DoC scheme, if it is FCC certified, please provide FCC ID.

-> Receiver isn't FCC certified yet, but it'll be FCC certified when get the FCC Part 68's certification.

Please contact me if it has problem.

Thanks & Best Regards
CHA
