Re: FCC ID: SSDHOTRODMETALV1

To Whom It May Concern:

The following application is submitted on behalf of our client, Hersey Meters, for evaluation of their model HOTRODMETALV1 for a class II permissive change under FCC Part 15.249.

The HOTRODMETALV1 is a utility meter transmitter intended for meter pit installation at or below ground level. This class II permissive change is to address an increase in the duty cycle of the transmitted signal and layout changes to the PCB. No component changes to the RF circuitry were made. This permissive change also addresses the use of in-ground plastic meter pit enclosures identified in this filing.

Testing was performed as installed in an in-ground meter pit with representative test data presented in this filing.

Sincerely,
