6731 Whittier Ave, McLean, VA 22101

May 24, 2006

RE: R-Tron, Inc

FCC ID: STESPAE030M

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please review your Label. The FCC registration number is not the same as FCC ID. Please change to read "FCC ID:"
- 2.) Form 731 incorrectly states the uplink power as 31.696 Watts. Please revise.
- 3.) The tune-up procedure provided is insufficient. How is this device tuned up at the factory? What are the target RF power values?
- 4.) The RF Exposure exhibit shows a "safe distance" of about 6cm. This is not correct. RF exposure for this case should calculate the levels seen at 20cm. Kindly revise this exhibit.
- 5.) This device contains a receiver as part of a Licensed transmitter. Therefore the regulatory statements of 15.19(a)(1) would apply. Please review and add this statement to the EUT as appropriate.
- 6.) The Operational Description and Tune-Up procedure is contained in the Manual. It appears these documents are essentially a cut-and-paste directly from the Manual. Since the Manual cannot be held Confidential, neither can the supplied Operational Description or Tune-up procedure. Please revise.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
