

RL-R6 CIRCUIT DESCRIPTION

RL-R6 Remote: SW1、SW2、SW3 will separately control the IC1's 8-cru,7-cru and 6-cru,meanwhile the ASK which created by IC1(Peripheral OSC circuit) will be output by IC1's 4-cru. After finished by SAW433.92MHz Filter and Q1 Triode Oscillator, the signal will be output by Printed Antenna.
