RE: Tuning and Quality Control

To Whom It May Concern:

Remote Possibilities LLC will confirm operation of each transmitter against a "benchmark" receiver.

There are no adjustable oscillator circuits, so no production tuning adjustments are required.

If you have any further questions or need additional information, please feel free to give me a call at Remote Possibilities LLC.

Sincerely,

A handwritten signature in black ink, reading "Sam Kimery". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.

Sam E. Kimery
CEO, Remote Possibilities LLC
