

FCC ID: SVDJP-78904

Circuit Description

The 49.86MHz crystal oscillator drives the base of Q1 the final/buffer amplifier. The modulation provided by Q2 and Q3. The output of Q1 has the matching network consisting of L1 and R21 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 6.3cm long Metal antenna.
There is no external ground connection. The ground is only that of the printed circuit board.
Electric current is supplied by a 9 Volt ("6F22" size battery x 1) primary battery

Operation Descriptions

The transmitter is a Voice transmitter operating at 49.86MHz band. The transmitter is powered by a 9V battery ("6F22" size battery x1) and the transmitting frequency is crystal controlled. The operation is achieved by different combinations of form amplitude modulating signal on the 49.86MHz carrier frequency.

Remarks:

The transmitter is a 1 Button transmitter.
The EUT continues to transmit while Button is being pressed.
It is Voice transmitter, Modulation by Microphone;
and type is Amplitude modulation.
