Answer #1: The modified photos are uploaded.

Answer #2: The modified user manual and report are uploaded.

Subject: BITWIRE Corp., FCC ID: SVRAH120A, Assessment NO.: AN05T4483,
Notice#1

Question #1: The test setup photos are distorted, please resubmit the setup photos with the correct size and H/L ratio.

Question #2: Please indicate ferrite core information of all the interface cables on the test report. This time, the user manual shows the AC/DC power supply comes with a ferrite core, but the external photos do not show clearly whether any ferrite core is on the power supply. Please clarify and update the report.

Best Regards,
Helen Zhao
