Dear Helen

How are you getting along?

I attached Three files. (Test Report, Test Setup photos, Operation Description)

Answer #1 : I test conducted emission and attached conducted emission test data to test report.

[Amendment Page of Test Report : Page 16, 22-27] [Amendment Page of Test Setup photos : Page 6-7]

Answer #2 : I test with PC's power variation from 85% to 115% and attached frequency stability to test report.

[Amendment Page of Test Report : Page 15]

Answer #3 : I attached bandwidth plot to test report.

[Amendment Page of Test Report : Page 28]

Answer #4 : attached is Operation Description.

I look forward to hearing from you soon.

Thank you.

Best Regards

Eun-won, Lee

Notice#1

Question #1: The test report said the device is powered via USB port of PC, please explain why power line conducted emission test is not included in the test report.

Question #2: The test report said the device is powered via USB port of PC, please explain

why frequency stability test vs. voltage is not included in the test report. You should test with AC power variation from 85% to 115%.

Question #3: Please provide a bandwidth plot to show bandedge (13.553MHz-13.567MHz) compliance, the emission out of the band should meet 15.209 limits.

Question #4: Please submit Operation Description for the transmitter. In future, please always submit Operation Description for the transmitter.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
