

## Circuit Description Transmitter

Battery power supply current to IC EM78P458APJ-G through C101, IC7805, C102, C116 etc output isobarically filters.

When press the key, oscillations (consist with Q3, C213, Crystal etc.) start working, and produce 27.145MHz carries wave ,at the same time pin 11 of IC EM78P458APJ-G, output coding, via Q201 modulated and then transmit through L03,C201,L02.
