FCC ID: SX5-EKG20100

In response to your comments regarding the application for certification of the devices referenced above please find our response below:

1)   The system receivers shall have input bandwidths that match the hopping channel bandwidths of their corresponding transmitters and shall shift frequencies in synchronization with the transmitted signals. Please confirm this is the case and submit. CFR Part 15.247(a)(1).

The response is included in a cover letter on the Manufacturer's Letterhead.

2)   Please review CFR 15.247(g)(h) and confirm that the unit complies with these part of the rules and include with confirmation letter on item number 6.

The response is included in a cover letter on the Manufacturer's Letterhead.

3)   Please provide a pseudorandom hopping frequency list showing hopping order of all 79 hopping frequencies.

Each device generates its own list using the hardware address as the seed. A hopping order list would only be valid for a single device.
