Features:
Bluetooth wireless connectivity
Support USB/TF card
FM Radio
AUX function
Rechargeable Lithium battery
Built-in microphone
Hands –free Call

Specification:

Driver unit size	:6.35cm(2.5)
Impedance	:4 Ohm
S/N ratio	:≥80dB
Separation	:≥45dB
Distortion	:≤1.0%
Frequency response	:100Hz-20KHz
Bluetooth version	:V2.1
Bluetooth range	:10meters
Bluetooth pairing name	:KTS-645
Bluetooth profiles supported	:A2DP
USB & TF max.memory supported	:16GB
FM radio	:87.5-108.0MHz
Battery capacity	:Built-in 800mAh
Battery type	:Li-ion
Playback time	:2 hrs at max volume
Charging indicator	:No
Input power	:DC5V

Accessory：
  USB charging cable: 1 piece;
  3.5MM audio cable: 1 piece;
  User manual: 1 piece

WARNING

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed   and used in accordance with the instructions, may cause harmful interference to radio communications. However,   there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful   interference to radio or television reception, which can be determined by turning the equipment off and on, the user is   encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
