

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A circular printed circuit board (PCB) component is shown against a blue background. The component is populated with various electronic components, including integrated circuits (ICs), resistors, and capacitors. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm). The ruler markings range from 0 to 100 mm.
Solder Board-Component View 2	 A circular printed circuit board (PCB) component is shown against a blue background. The component is mostly blank, with a small rectangular cutout in the center. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm). The ruler markings range from 0 to 100 mm.

Solder Board-Component View 3	 A photograph of a small green printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is irregularly shaped with several electronic components soldered onto it, including two large purple electrolytic capacitors, several smaller green and black capacitors, and a small integrated circuit. A white label with a QR code and the number '3' is attached to the board. Two thin wires are soldered to the right side of the component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '4', positioned on a blue textured surface. The component is irregularly shaped with several electronic components soldered onto it, including two large purple electrolytic capacitors, several smaller green and black capacitors, and a small integrated circuit. A white label with a QR code and the number '4' is attached to the board. Two thin wires are soldered to the right side of the component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, likely a WiFi module, resting on a blue textured surface. The component is irregularly shaped with various electronic components soldered onto it. A black ruler with white markings is placed horizontally and vertically next to the component for scale. The horizontal ruler shows markings from 0 to 100 mm, and the vertical ruler shows markings from 0 to 100 mm. The component is positioned near the 10 mm mark on the vertical ruler and the 40 mm mark on the horizontal ruler.
Antenna View	 A photograph of the same green PCB component, showing the antenna side. A red rectangular box highlights a white rectangular component labeled "WIFI Antenna". A red line points from the text "WIFI Antenna" in a red box to the highlighted component. The component has a QR code and some text on it. The background is a blue textured surface.
