

Solder Board-Component View 5	 A photograph of a small, square electronic circuit board (PCB) with a blue solder mask. The board is populated with various components, including a central microcontroller, several integrated circuits, and surface-mount components. It features multiple gold-plated edge connectors. The board is placed on a black surface with a white ruler for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a light blue textured surface.
Solder Board-Component View 6	 A photograph of the same electronic circuit board (PCB) as in View 5, but with a large, black, circular component (likely a lens or a large capacitor) mounted on the top surface. The board is placed on a black surface with a white ruler for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a light blue textured surface.

Solder Board-Component View 11	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters, with the component located between the 10 mm and 20 mm marks. The background is a light blue surface with a fine grid pattern.
Solder Board-Component View 12	 A photograph showing a small electronic component, similar to the one in View 11, mounted on a blue PCB. The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters, with the component located between the 10 mm and 20 mm marks. The background is a light blue surface with a fine grid pattern.
