Timco Engineering Inc.

Our ref: CSEFCC002

FRN N⁰: 0012636486

Grantee Code: SZBCSE305

Dear sir

With regard to our application for FCC compatibility under CFR 47 : 2004 Code of Federal Regulations: Pt 15 Subpart C – Radio Frequency Devices-International Radiators.

I am applying for PERMANENT confidentiality for the CSE305 radio remote control for the following :

- 1 The design schematics.
- 2 PCB layout

This application has been presented in support of the above design, we feel the design overcomes the power output requirements of the FCC regulations in a unique design combination of PCB layout and electronic design, and therefore wish to maintain our right to confidentiality thus protecting our design from publication in the public domain.

Yours faithfully

A. Fielden
