A photograph of a green printed circuit board (PCB) for a mobile device. The board is populated with numerous surface-mount components. A large white square component, likely a camera module, is mounted in the upper right. A black integrated circuit (IC) is visible in the lower right. Several capacitors, including a large yellow one in the upper left and two large silver ones in the lower left, are present. The board has a date code '20080422' printed on it. Various other components like resistors, diodes, and smaller ICs are scattered across the surface. The board is mounted on a blue textured background.
