

RT-V009A

Now you can transmit your favorite tune from portable music players to your car or home stereo quickly and easily.

Just plug the FM Transmitter into the headphone jack of your MP3 or connect it to your PC , laptop computer, MP4, PDA , CD, VCD, DVD. Tune your car stereo or receiver to the clearest FM frequency, and enjoy your digital music with full sound and convenience.

Application: ipod, mp3, mp4. CD, cassette player, camera, game console, pc&laptop computer.

Features:

- Power supply: car cigar plug, DC 12V
- Output frequency: Digital 88.1-107.9 MHz All-frequency stereo transmission
- LCD display
- Support various audio signal transmissions from iPod, MP3 Player, PMP, PDA, MP4, as well as mobile phones.
- Special connector for ipod, mp3, mp4.
- The headphone socket in 3.5mm is for audio signal input
- Built-in USB interface for battery charge of iPod, MP3, MP4, mobile phone if necessary
- With remote control , it can remote the memu of ipod and iphone .

FCC NOTE:

THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However,

there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Operation:

- 1、 Press the power button “ON/OFF” for a few seconds, the LCD display shows: “ON 88.1MHZ”, “88.1MHZ” is the transmission frequency.
- 2, click the “^” or “v” button, to adjust 0.1M frequency up or down.

Specification:

- Digital 88.1-107.9 MHz All-frequency stereo transmissions
- Step: 0.1MHz.
- Operating distance: >5m.
- FM frequency deflection: 75kHz.
- Audio frequency distortion: 3% (F=75KHz, f=1KHz)
- Frequency stabilization: $\pm 10\text{ppm}$.
- SNR: $\geq 45\text{dB}$.
- Separation degree from right and left: $\leq -60\text{dB}$
- Power output: 12V DC
