March 4, 2006

RE: Uni-Tat International (HK) Ltd.

FCC ID: T2E-UTMRR05-GENIS

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Kindly discuss how this device was tested and found to comply with the limits with the limits for devices with a periodic rate of less than 20Hz. Please see 15.35(a), especially the "Note:" which applies to this rule section.
- 2.) You have requested the two-part statement of 15.19(a)(3) be moved from the device to the blister pack. This is not allowed. It is permissible because of the small size to move this statement to the Manual, but there are no provisions in the Rules which would allow this to be placed on the packaging.
- 3.) The antenna seems to be a simple wire easily accessible by the consumer and easily changed. Kindly explain how this antenna meets the requirements of 15.203. In addition, since this antenna is easily formed into any shape, please discuss what steps were taken to maximize emissions not only for the fundamental but also the harmonics.
- 4.) Please confirm that no Confidentiality shall be included with any of the submitted exhibits uploaded to the FCC website.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
