

**Johnny Stewart Wildlife Calls**  
**Attractor Remote Digital Caller**  
**Operating Instructions**

**Attractor Remote Digital Caller**

Your new Attractor Remote Digital Caller is backed by 40 years of experience. The Attractor will create incredible fun and success for your enjoyment of the outdoors. Whether used for hunting, photography or observation of wildlife, the Attractor will create opportunities for you to experience nature up close in a dynamic way with *Superior Sounds...Dynamic Results*.

**Attractor Features:**

1. Authentic Johnny Stewart Live Animal Recordings, Digitally Re-mastered.
2. Remote control operation up to 50 yards.
3. 13 ounces total weight.
4. 5 digital call sounds and 1 stop button.
5. Continuous play.
6. 15 second sound loops.
7. 90 decibels\* at full power.
8. Weather resistant sturdy construction.
9. Weather-guard molded seams.
10. Water-resistant speaker cover.
11. ON/OFF Volume Control Switch on Base Unit.
12. Green LED light power indicator.
13. Non-slip push button pads on Transmitter.
14. Remote transmitter holder.
15. Heavy duty nylon lanyard.
16. 4 AA and 1 12 volt batteries included.
17. **Note\***: Combining Attractor Remote Digital Caller with Power Pro Convert-A-Caller (PPC-1) will significantly increase volume from 90 decibels (db) to 120 db.

**POWER SOURCE**

The Attractor is powered by four AA batteries in Base Unit and a single 12 Volt battery in the Transmitter (batteries included). No need to fumble with screws on Base Unit to change 4 AA batteries. When powered on, the Green LED light will glow on speaker. Maximum performance is provided by alkaline batteries. Note: The Attractor will NOT shut down due to inactivity and remains powered until Base Unit is manually shut off.

## **CALLING OPERATIONS**

To begin calling with the Attractor, turn on volume control switch, indicated by Green LED light on speaker. Begin calling by pressing the button on transmitter located next to the desired sound. Selected sound will play continually until stop button is depressed on transmitter. To change sounds while calling, depress desired sound button on transmitter. Increase/decrease volume by rotating the volume control switch on Base Unit only.

Note: Combining Attractor Remote Digital Caller with Power Pro Convert-A-Caller (PPC-1) will significantly increase volume from 90 decibels (db) to 120 db.

## **BELT LOOPS/LANYARDS**

The belt loop on the back of the Attractor Base Unit and Transmitter can be removed with Philips screw driver. Using the lanyard to hang Base Unit from limb or bush will increase remote range beyond 50 yards, depending on conditions. Attaching lanyard to transmitter to wear around neck eases operation and helps prevent loss/damage.

## **STORAGE**

For proper storage ensure that the Attractor is turned off. If you intend to store your Attractor for an extended period, the AA batteries should be removed from the Base Unit.

## **MAINTENANCE**

With proper care your Attractor requires little or no maintenance. Always carry a set of new batteries in your vehicle. The 12 volt, 23 amp battery in Transmitter can be purchased at most Battery or Hardware Stores.

## **ATTRACTOR WARRANTY**

Your Johnny Stewart Attractor Digital Caller is a quality product, fully warranted against defects in materials or workmanship for a period of 90 days from the date of purchase. Faulty parts covered under this warranty will be replaced free of charge. If it becomes necessary to return your unit, all shipments must be insured and prepaid to and from the factory. This warranty is void if the warranty card has not been returned to us at the time of purchase.

This warranty shall not apply if the unit has not been operated in accordance with the instruction or the machine has been altered, repaired, mistreated in any way that we believe has caused the failure or destruction of the unit. This warranty is in lieu of all other expressed or implied except for any special written agreement entered into with Johnny Stewart.

## **Important Notices & Return Policy**

If you experience difficulty or have any questions please call:

Hunter Specialties, Inc./Johnny Stewart Wildlife Calls at 1-319-395-0321

Please fill out and return the warranty card provided. Serial Number is located inside AA battery compartment on Base Unit.

**FCC Warning:**

Changes or modifications to this unit not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment. Any change to the equipment will void FCC grant.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (base unit).
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The Attractor is in compliance with FCC radiation exposure limits set forth for uncontrolled environments.
