RE: FCC ID: T3K-ICARE-S3300-A_ATCB003423
Attention: Daniel Lee

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the external photos provided to the FCC must be of the product as sold in the US. Please note that the AC charging adapter shown in the external photos are for an EU version. As the adapter is not a US adapter, it is assumed that the photos themselves are thus not of a US version. This is further supported by the internal photos showing a CE marking but no US information. Please provide external photos for the US version of this device.
2. Please note that the first page of the parts list is not in English. Please also note that the column headings on all pages are not in English. Consequently, I have no ability to understand what is being presented. Please adequately explain the contents of the first page and subsequent column headings of the parts list (i.e. please provide a translation of the first page of the parts list).
3. Please note that while the formula $EIRP = \text{output power} + \text{substitution antenna}$ is given on page 23 of the report, the data table on page 24 does not give clear indication as to how this information was obtained. Please confirm if the antenna substitution gain is fed into the analyzer and the result is automatically added within the instrument or if other calculation methods are used. IF other methods are used, please explain.
4. Please note that the FCC has stated and maintains that the manual is to provide that highest SAR levels recorded for the device. Please provide a manual that adequately addresses the SAR requirements posed by the FCC. The manual should contain the following: the highest body and head SAR along with any separation distance required and the non-metallic accessory use.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
