

### RF Exposure Statement

The PAK-LINK Computer Interface (Snappy), FCC ID T5E 200673, is not body mounted. The measured peak output power level at 2.425 GHz (its only frequency of operation) is less than 1 mW. The user and/or general public will not be exposed to RF energy levels in excess of FCC guidelines, per OET Bulletin 65 Supplement C, Edition 01-01 June 2001.
