Declaration of Product

"We E28 LTD, the applicant of model E2831 declare that the dual mode phone works only one mode at a time. That means: when it is being connected to the VoIP, it will not be activated by a GSM incoming call at the same moment.

And the phone only can enable one module between the Bluetooth and WLAN at the same time.

The operation characteristic as below:

- 1) VoIP is established – When VoIP is established, the GSM module is still on and it is able to receive RING message from GSM. However, if RING receives, the phone will reject the call automatically as VoIP call is on.
In this WLAN mode, the Bluetooth module is disenabled.
- 2) GSM call is established – When GSM call is established, the phone can receive SIP call request. However, when this request is received, the phone will reject the call automatically as GSM call is on."
In this GSM mode, the Bluetooth module can be enabled."

Sincerely yours,

Safety Precautions:

	Comply with the rules and regulations of airliners strictly, power off your mobile phone when on air plane to avoid any interference with equipments. Use of the mobile phone on airplane is illegal.
	The mobile phone may interfere with medical devices such as hearing aids and pacemakers. Power off your mobile phone in hospitals or other healthcare site with explicit stipulations. The patient who uses the pacemakers should keep his mobile phone away from the pacemaker.
	Do not disassemble the mobile phone or its accessories by yourself.
	Do not use the mobile phone at gas station, oil depot and area with chemical product or other flammable and explosive substance, to prevent fire hazard or explosion.
	Do not discard waste batteries randomly. Do not put the battery into fire, water or contact it with metal conductor, to prevent explosion or short circuit.
	Use certificated power supply and charger.
	Use the earphone or hands-free device when driving to prevent accident. Comply with local rule and regulation about the usage of mobile phone strictly.
	Note that the mobile phone may interfere with computer, TV, radio and other electronic devices.
	Keep the mobile phone away from children to prevent that the SIM card is swallowed or the mobile phone is fallen off.
SAR	The highest SAR value for this model phone when tested is 0.921 W/kg for use at the ear and 0.475 W/kg for use close to the body. For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.
EMC	This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference

	<p>in a residential installation.</p> <p>This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <ul style="list-style-type: none"> —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.
Warning	<p>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:</p> <ul style="list-style-type: none"> (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
Note:	<p>The color of the phone, simulated screen, the illustration and related images may be different from that of actual mobile phone. Please refer to your handset for actuality.</p>

1 Quick Reference

1.1 Mobile Outline

1.2 SIM Card Installation

Caution

1. E2831 supports latest 3V SIM card. Apply for a new from the mobile operator if the old 5V SIM card is used. Most of mobile operators will replace it with a new without change of the phone number.

2. Do not bend or scratch on SIM card, and keep it away from static electricity, dust or water.

Insert the SIM card

①

②

Lift Here

③

④

Power off the mobile phone before removing the battery.

1. Take out the stylus. Press the up part of battery cover. Slide the battery cover down, and lift the battery cover to remove it.
2. Take out the battery
3. Slide SIM card into the card slot with the notch in the upward right corner and the gold plate facing down.

①

②

Take out the SIM card

Power off the mobile phone before removing the battery, and then slide out the SIM card.

1.3 Battery Installation

Warning

1. DO NOT remove the battery or switch the power off abnormally when the mobile phone is power-on or in the charge status, to prevent the mobile phone from damaging or losing data.
2. DO NOT contact the battery with conductor, to prevent damage from short circuit.
3. DO NOT use battery which is not from original manufacturers or is not specified model.
4. Caution risk of explosion if battery is replaced by an incorrect type

①

②

Lift Here

Power off the mobile phone before removing the battery.

1. Take out the stylus. Press the up part of battery cover. Slide the battery cover down and lift the battery cover to remove it.
2. Insert the battery with the battery label facing up.
3. Push the battery down to fall into?
4. Place the battery cover on the phone and slide it up to lock.
5. Place the battery cover on the phone and slide it up to lock .

1.4 Installation of Extended Memory

Caution

1. For some Micro SD with poor compatibility, please note to purchase and use certificated memory.
2. Pull down and turn the cover of Micro SD over before taking out the Micro SD. Don't pull out it by force.

Install the Micro SD card

①

Power off the mobile phone, you need remove the battery and SIM card firstly, then insert the Micro SD card.

Take out the Micro SD card

①

Power off the mobile phone, you need remove the battery and SIM card firstly. Push forward the Micro SD and release your pressure, Micro SD card will be out of slot, and then take out the Micro SD.

1.5 Charge

Caution

If the battery is discharged completely, the charge indicator will not appear after the charger is plugged in and the mobile phone can not be power on immediately. It is necessary to wait for about 10 minutes until the charge indicator appears.

USAGE OF TRAVEL CHARGER:

1. Connect the tap of the charger to the Mini USB connector at the bottom of the mobile phone.
2. Plug the power supply of the charger into the socket of the main power supply.
3. The battery meter will flash when charging. It will be normal if the charger is hot for the long charge time.

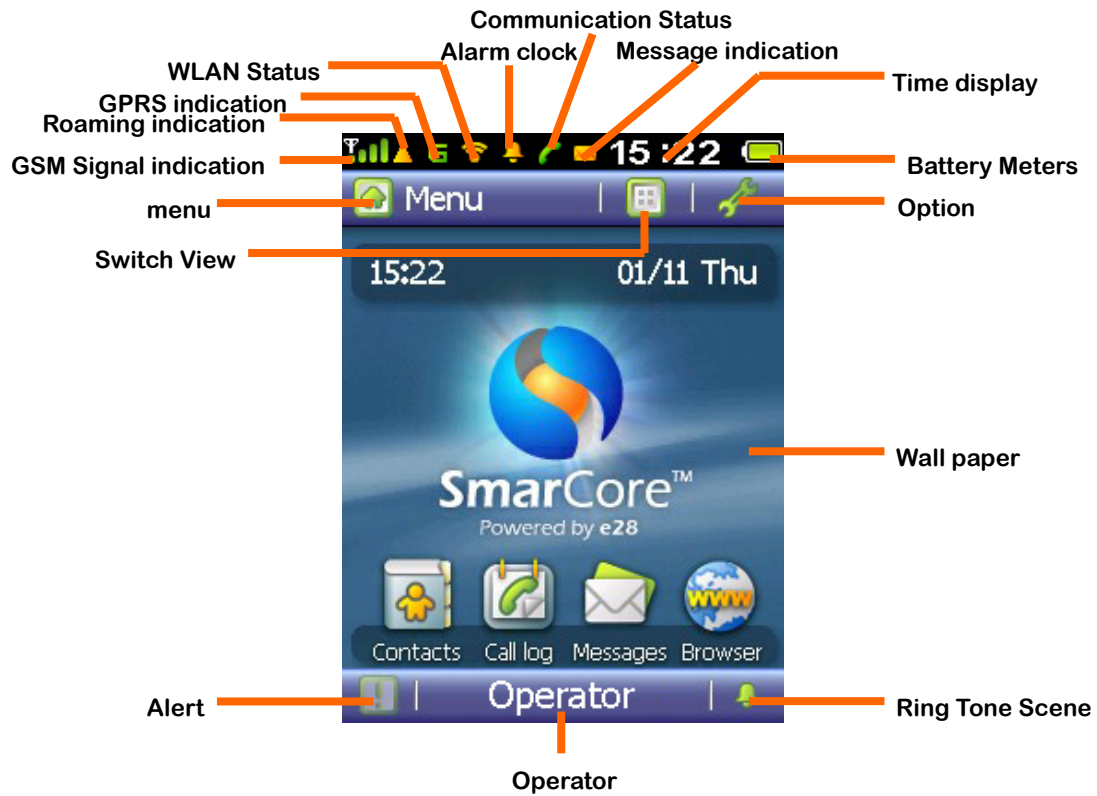

4. The indicator LED will turn into yellow when the battery is full.
5. Switch the power supply off before the mobile phone is disconnected from the charger.
6. If the battery is discharged completely, the charge indicator will not appear after the charger is plugged in, and the mobile phone can not power on immediately. It is necessary to wait for about 10 minutes until the charge indicator appears.

USAGE OF USB CHARGER:

E2831 provides users with the USB charge function, and it only needs to connect the USB data cable with the computer for charging. Although the USB data cable can be used to charge, the battery may not be charged fully for low current supply or it will shorten the life of the battery, so the USB charger should be used as few as possible unless it is necessary.

1.6 Idle Screen

The idle screen is the start screen of the mobile, from which to enter into various applications.

Status icons

The state bar is at the top and bottom of the idle screen, of which several icons indicate current status of the mobile phone.

	New message (SMS/MMS)
	Clock
	Battery is full
	Battery is empty
	With GSM service, no GPRS service
	With GSM service, GPRS available
	Roaming
	Call active
	Call on hold
	Mute model, no ringing or vibrating
	Ringing mode
	Vibrating+ ringing mode
	Vibrating only mode
	Vibrating before Ringing

	With alert
	No alert (wrong icon, need change)
	WLAN service disabled, no Icon shown
	WLAN service enabled, but without WLAN connection (wrong icon, need change)
	WLAN ready to serve (wrong icon/color, need change)
	WLAN and VoIP service ready to serve (wrong icon/color, need change)

The idle screen of E2831 provides several views such as calendar ,clock,shortcut and none. Press  to select the view mode, and press  to configure the display content of current view.

1.7 Keypad usage

Keypad usage :

You can discard operations and return to idle screen by pressing “Cancel” key in most cases except for some critical operations such as making phone call. When “OK” key is pressed, it means you confirmed some kind of activities, such as entering an application, selected a menu item or confirmed an option, etc.

You can come up with dialing pad and input telephone numbers by pressing the number key on idle screen.

Operating on pull-down menu, you can:

1. Move up in menu item by pushing “Up” key.
2. Move down in menu item by pushing “Down” key.
3. Return to upper level menus by pressing “Cancel” key.

Operating on list view, you can:

1. Move up in list by pushing “Up” key.
2. Move down in list by pushing “Down” key.
3. Select the item by pressing “OK” key.

Screen lock/unlock key usage:

To prevent from unintentional pressing keyboard or screen, please press “Power/Screen Lock” key to lock keypad and touch screen. Press “Power/Screen Lock” key again to unlock.

You cannot operate the mobile phone while the screen locked, Please press “Screen lock” key to unlock mobile phone before further operations.

All application except MP3 player will quit to idle screen while the screen is locked.

You need to unlock mobile before you can long press “Power/Screen lock” key to power off mobile

(Other special functions will be described in the later section)

1.9 Accessory

Please refer to the packing list in product package.

Headset

E2831 support stereo headset. To answer or end a call, you need press and hold the headset's button for one second.

2 Telephone

E2831 provides a lot of ways for dealing with telephone, which makes it at your greatest convenience to dial or answer a phone call, do call diverting and do call waiting.

E2831 provides 400 records of call logs including 100 records of missed calls, 100 records of answered calls, 100 records of outgoing calls and records of rejected calls.

It is most worthy to mention about the super high capacity of contact book of E2831. It can store 1000 items of contacts; each contact can present information such as mobile phone number, home phone number, business phone number and so on. Furthermore, the photo and ring tone can be set individually for each contact. Contacts can be sorted by groups or categories for easy management.

Note: Above capacity is the recommended upper limit. The large capacity will affect the use performance to some extent.

2.1 Telephone Functions

2.1.1 Dialing

E2831 provides vary of manners for dialing. You can dial directly by clicking dial pad on touch screen, inputting phone number by keypad, dialing out from contacts book, photo dial or call log.

1. Click on desktop wallpaper area on idle screen to bring out dial pad.

(1)

2. Press number key to input the phone number which will be displayed in the number box.

Click  on the screen or press "C" key on the keypad to delete a digit before cursor.

(2)

Tips

E2831 provides unique intelligent auto fill-up function to help recall the dialed number quickly. When the first several digits are matched with one dialed number, the mobile phone will make up the rest digits automatically. If the filled result is not what you want, you can just continue to input the rest digits and the auto filled digits will disappear.

3. Click **【Dial】** soft button to dial the phone number shown in phone number box as a GSM phone call. Click **【VoIP】** soft button to dial the phone number as a VoIP call (Please refer to section 8.7 WLAN & VOIP settings to configure your VOIP settings before you can make or receive a VoIP call). If the number matches with that in contact book, the corresponding name, photo and phone number will be displayed. Otherwise, the phone number with default picture will be displayed.

(3)

Click  to dial extension or input digits (for example, input you account or password)

Click  to switch mute. Change icon

Click  to hold current call (need operator service support) change icon

Click  to do third party call and conference call (need operator service support)

Change icon

4. You can also input telephone number by keypad, and dial out GSM call by “send” key or dial out VoIP call by “VoIP” key.

5. Click **【End】** soft button on screen or press “End” key to end the call

2.1.2 Photo Dial

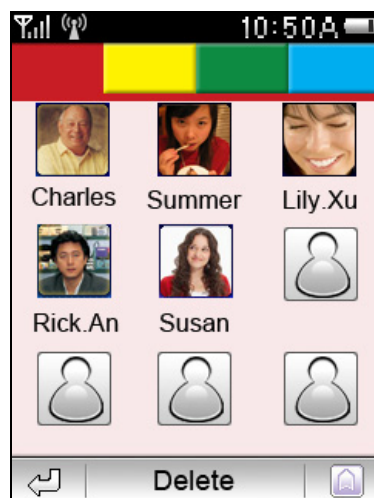

Click  on dial pad to access photo dial.

Photo dial makes the phone dialing easier and more directly. You can simply press the photo of the contact to dial corresponding phone. It is easy to set up photo dial. Press Blank to select a contact person from the Phonebook. A zoomed photo of the selected contact will appear after the photo dial is set up. If the contact not includes a photo, a default picture is displayed.

(4)

If replacement required, click **【Delete】** to delete the highlighted person contact, and then

click blank contact to set one photo dial contact again.

In order to facilitate the contact searching, there're four groups of photo dial contacts, which is different in background color. Each group contains 9 photo dial contacts.

2.1.3 Quick Dial Numbers in SIM Card(GSM call only)

You can dial the number stored in SIM card by storage index on dial pad. Input the storage index of the contact of your SIM card and then click “#” button, the corresponding phone number will be shown in the number box. Click **【Dial】** button to dial out GSM call.

2.1.4 Answer Call

Caller ID will be matched during an incoming call, whatever the incoming call is a GSM call or a VoIP call. The name and photo will be displayed if caller ID matches any contact. Otherwise, only caller ID and default photo will be displayed. You can answer or reject call, or set phone busy.

(5)

Keypad usage:

1. Press “Send” key to answer call.
2. Press “End” key to reject call.

Tips

You can push up (down) the **Up/down key** to turn up (down) the audio volume during the call. The audio volume setting will be saved and affected before you adjust the volume again.

2.2 Contacts

R2381 provides contact book with high capacity. Each contact is a big social database which contains name, mobile phone number, home phone number, business phone number, FAX number, address, birthday, etc.

E2831 contact book can be managed by groups and categories. Contacts can be sorted into categories such as family, friends, colleague, etc. And you can define groups as well.

E2831 contacts book also provides custom function to set the phone for the contact person, which will be displayed as the caller ID on incoming call. What's more, each contact can be specified to use the unique ring tone.

In idle screen, tap **【Menu】** or you can press “Down” key to open the menu list.

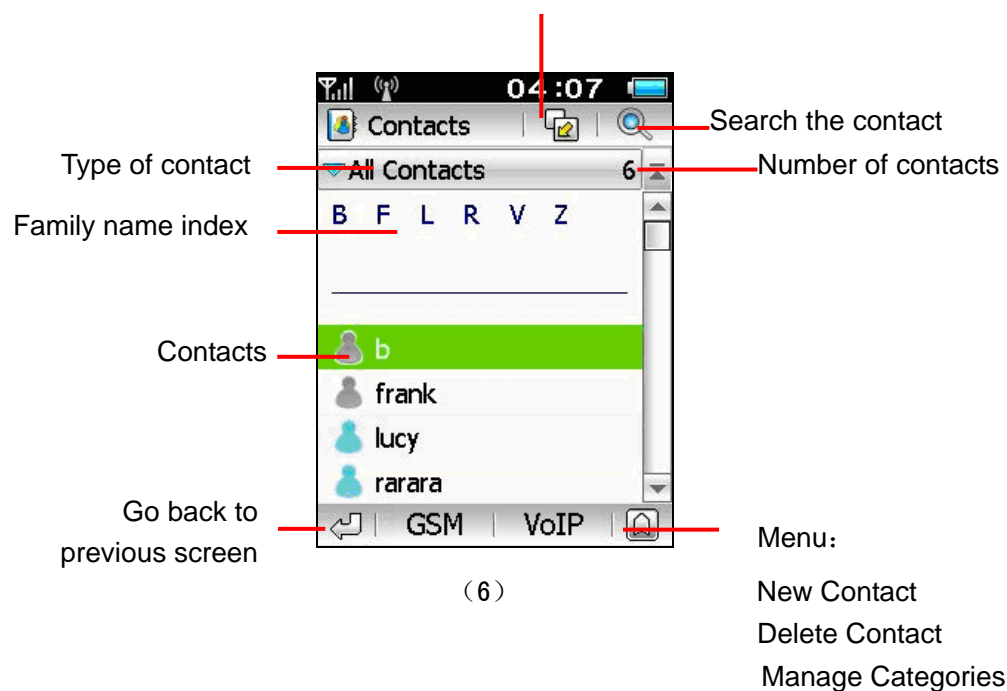

Add one picture to show menu list.

【Menu】 → 【Contacts】

Click **【Contacts】** from Menu list to open the application of Contacts .

Or you can press “Up” or “Down” key to select the Contacts application from Menu list and press “OK” key to open the application of Contacts.

**Select view manner (View by List/View by Thumb) and
sort manner (View by Last Name / View by First Name)**

(6)

Manage Groups
Copy from SIM card
Copy to SIM card
Backup to Micro SD
Restore from Micro SD

Press "OK" key to call the contact you selected by GSM. The call number is the first number of this contact .

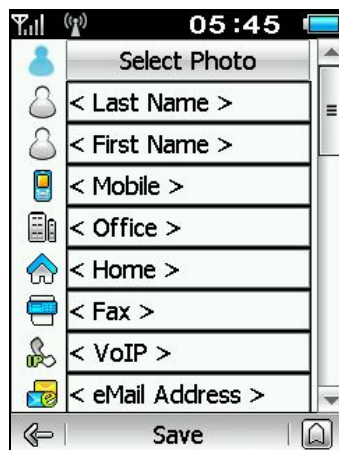

Click "GSM" on the screen to call the selected person by GSM,

Click "VoIP" on the screen to call the selected person by VoIP.

2.2.1 New Contact

Click **【New Contact】** from Menu list can add a new contact on contact list (screen 6).

Each contact contains name, mobile number, business phone number, home phone number, FAX number and VoIP number, and multimedia data such as photo and ring tone.

(7)

2.2.2 View Contact

Click a contact on contact list screen (6), a detail view screen will come up.

Menu:

Change picture

(8)

Click  (**change icon**) to view events related to this contact and add new event for this contact.

Click  (change icon) to send Vcard of this contact to other by SMS

Click the phone number to make this number into number box in phone call screen.

A pop-up menu will come up while hold a contact for a period of time by stylus (screen 9), It has following menu items: View details, Dial Number, Prepend Dial, Send SMS and Send MMS.

(9)

A pop-up menu (10) will come up while hold a contact number for a period of time by stylus.

It has following menu items: Dial Number, Prepend Dial, Send SMS and Send MMS.

(10)

Caution

Usually it only contains names and one telephone number in SIM card contact because of short of storage memory, while contact stored in mobile phone contains much more information. Therefore, the device will ask user to selectively store information while copy contact from mobile phone to SIM card since there's no enough storage space. On the contrary, user need to specify which item in mobile contact will store the information copied from SIM card.

2.2.3 Search Contact

On screen (6), you can click  (change icon) to search contact.

(11)

You can search the contact by name, number, company or notes.

To search by name, input any word matched with the name.

To search by string or digits, it can match with any part of the material for the contact.

2.2.4 Delete Contacts

Select to **Delete contacts** from menu on the contact listing screen (6).

2.2.5 Groups and Categories

Categories are usually used to category management. For instance, you can quickly search contact by selecting to display only some category, or specify different ring tone for different category.

Groups are usually used to send group message (SMS/MMS included).

One contact can only be of a category, but it can be of different groups.

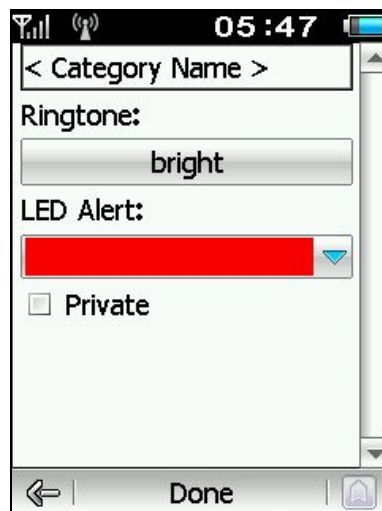

2.2.6 Manage Categories

Select **Manage Categories** from menu on the contact list screen (6). E2831 will list existing editable categories in the phone.

(12)

Click **【New Category】** to add new category:

(13)

In the new category, you need to:

- ◆ Input category name.
- ◆ Select ring tone of the category.
- ◆ Whether or not to private the category.

2.2.7 Manage groups

Select **Manage Groups** from menu on the contact list screen (6) to enter into groups management screen as following figure:

(14)

Click **【New Group】** to add new group:

(15)

In the new group, you need:

- ◆ Input group name.
- ◆ Select the type of the group: SMS/MMS, E-mail.
- ◆ Click  change icon to select members of groups from the contacts.
- ◆ Whether or not to private the group.

2.3 Call Log

E2831 provides 400 records of call log including 100 records of missed calls, 100 records of answered calls, 100 records of outgoing calls and 100 records of rejected calls.

【Menu】→【Call Log】

Click **【Call Log】** from Menu list to open this application.

Or you can press “Up” or “Down” key to select this application from Menu list and press “OK” key to open this application.

View by Date/ View by Name / View by Call Meters

Click pull-down box to select the type of record:

-  All calls
-  Outgoing Calls
-  Answered Calls
-  Missed Calls
-  Rejected Calls

(16)

Menu: View details

Paste

Click  to insert quick message change icon

Click  to insert Image/take photo/insert Video/capture video/new drawing change icon

Click  to insert sounds/ insert recording change icon

Click **【Recipients】** to input the number of a recipient

Click **(icon)** to select the recipient from the contacts book. Click the top and right corner of screen (5) to retrieve it by the group

3.4 Delete Message

Select the **delete message** from the menu of message screen (1).

4 WLAN

E2831 support WLAN feature. E2831 can connect to AP (access point) compatible with IEEE 802.11b/g. After connect to WLAN, you can enjoy internet browsing, picture downloading, checking Email etc. And after register to one VoIP server that support standard SIP protocol, you can make VoIP call with E2831.

You can use WLAN/VoIP by following steps:

Step 1: Enter into the WLAN

Click **【WLAN】** from Menu list to open this application.

Or you can press “Up” or “Down” key to select this application from menu list and press “OK” key to open this application.

Step 2: Enable WLAN

Click the “Enable” soft button to enable WLAN in the WLAN setup screen. E2831 can scan and list the available APs with security information and signal bar to show the signal strengths of each AP (More bars states for more wireless signal power, which generally result in better quality of WLAN connection.) Then you can connect one AP by clicking the one you need.

The WLAN icon  will be shown on status bar once you enabled WLAN. (change icon/picture)

(1)

Menu: Edit
Refresh
Perferred networks
WLAN setup

Click the “ICON” at the right and bottom corner to enter the menu

“ Edit”: when you select one AP, you can enter “ Edit” screen and edit to enable WEP, input password, select VoIP server.(screen X)

“Referesh”: let you re-scan AP

“Perferred networks”: take record the latest 20 APs you connected to.

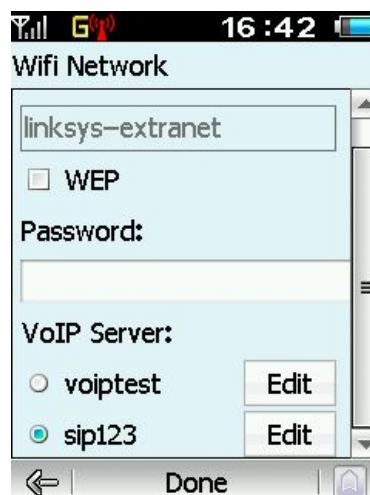

“WLAN set up”: Please refer X.X WALN&VoIP setting.

Step 3: AP authentication

Some APs request authentication procedure before you can proceed. (one “Lock” icon show in this AP status bar). You need to check “WEP” option and input password before you can connect to WLAN. If this AP don’t need authentication, you can skip to tap “Done” directly(Password input box will be grey).

Now you have set up the WALN connection. You can surf internet, send/receive EMAIL, etc. However, you need to finish step 4 before you can make VoIP phone call.

The WLAN icon change to  . (change icon/picture)

(2)

Step 4: register VoIP server(optional) (change icon/picture)

Select one VoIP server in screen (2), then tap “Done”. E2831 will register to the selected VoIP server.

The WLAN icon change to  after E2831 successfully register to VoIP sever. (change icon)

Please refer to secton 8.7 WLAN&VoIP setting to configure yours VoIP settings if you don’t find any VoIP server.

If you finish setting up WLAN&VoIP, you can use VoIP by following shortcuts

- 1) In idle screen, click WLAN icon. (add icon).

Add picture

- 2) In idle screen, press “up&VoIP” key to enter screen X

Screen

5 Application

E2831 builds in such applications as file manager, calendar, eMail, Memo, World Clock, Alarm Clock, Calculator, and Java

【Menu】 → 【Application】 (changer screen)

Three sets of alarm clock are allowed to set and each of which can present its own repetition cycle.

【Menu】→【Application】→【Alarm Clock】

(10)

Menu:
Turn All On
Turn All Off

(11)

You can set:

- Whether enable alarm clock
- Alarm time
- Repeat cycle
- Alert music
- Whether vibrate
- Snooze time

5.8 Calculator

【Menu】→【Application】→【Calculator】

(12)

5.9 Java

【Menu】→【Application】→【Java】

E2831 support MIDP2.0, and can run the Java program.

JAVA

Related knowledge

Java is an open and safe computer programming language, of which the platform that fits for the mobile phone is referred to as K-Java. The Java games and applications can be downloaded from the internet or ISPs to turn your mobile phone into a game computer or a stock machine.

5.10 Instant Messenger change screen&icon

E2831 provides IM(Instant Messenger) function that you can contact your friends at any time. And you can enjoy same convenient IM in mobile as you are in office.

Please refer to section 8.7 WLAN&VoIP settings to configure your WLAN&VoIP settings before you use IM function. And this IM function only can be used after connecting to WLAN and registering to VoIP server.

【Menu】→【Application】→【Instant Messenge】

(1)

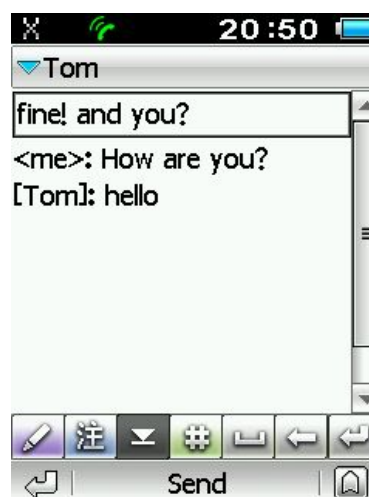

Click 【Add】 to add new friend to buddy list on the screen (2).

Click  to select: All/Online/Busy/offline/Black list

Click the selected friend name to talk. screen (3)

(2)

(3)

6 Sight & Sound change screen&icon

E2831 provides abundant image functions and integrates with digital camera function, so the exciting moments can be recorded at any time and everywhere, and the photos can be saved to the phone or the Micro SD. Furthermore, it can be set as wallpaper or a face picture with incoming call. The photos also can be sent to your relatives and friends by MMS.

E2831 supports various picture formats such as JPG, PNG which can be set as the wallpaper to present your unique personality.

【Menu】 -> 【Sight & Sound】

(1)

- Photo Camera –Enable digital camera to take photos
- Video Camera– Record video clips
- MP3 Player – Play MP3, MIDI
- Gallery – Display Pictures
- Video Player – Play video clips

6.1 Photo camera

E2831 builds in CMOS digital camera and can support up to 4 times of digital zoom. Furthermore, it can provide many environmental modes and capture delays. The photos can be saved to the mobile phone or Micro SD. What's more, it can be set as a desktop or a face picture with incoming call.

6.1.1 Take photos

【Menu】 -> **【Sight & Sound】** -> **【Photo Camera】** to activate the digital camera

(2)

Menu:

Show Information

Mode (Indoor/Outdoor/Evening)

Effects: Full Color/ Sepia/ Black & White

Flicker Control: 50 Hertz/60 Hertz

Show Date/Hide Date

Add frame (only for 240X240 photos)

Save to phone/Micro SD

Click  to select the resolution of the photos

Click  to digitalize the zooming

Click  to adjust the lightness

Click  to set the capturing delay time (0/5/10/15 seconds)

Click **【Capture】** to take photos

Tap **【Review】** to review the photo just taken

Keypad usage

1. Push the Up/down key upwards to zoom in/out the pictures

Tips

Digital zooming varies depending on the size of the photo. For the resolution 240×240 , up to four times of zooming can be achieved. For the resolution 1280×960 , the digital zooming will not take into effect.

6.1.2 Review Photo

(3)

Menu:

Original size

Set as Wallpaper—Set the picture as wallpaper

Copy to micro SD /phone

Move to micro SD /phone

【Menu】 -> 【Internet】 -> 【Data Meters】

You can view the data received, data sent and total data.

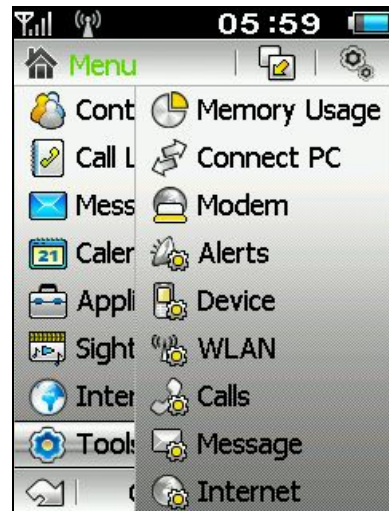

(4)

8 Tools & Setup

E2831 provides overall and effective system management to set various parameters conveniently or individualize the phone.

【Menu】 -> 【Tools & Setup】

(1)

Memory Usage - View the use status of phone memory and Micro SD card memory

Connect PC –Connect the phone to a computer by the USB cable

Bluetooth - set up Bluetooth and seraring other Bluetooth device

MODEM – Take the phone as a modem to access to wireless Internet

Alerts – Set the alert of the incoming call/SMS/event, etc.

Device – Set the date and time, the theme and Sounds, auto power on/off, security settings, and the screen brightness, etc.

WLAN – Set the WLAN&VoIP connection to implement the wireless Internet function

Call – Set the network settings, incoming and outgoing call settings

Message –SMS setup, MMS setup, signatures and etc

Internet– connection setup and internet setup

8.1 Memory Usage

【Menu】 -> 【Tools & Setup】 -> 【Memory Usage】

View the use status of phone memory and Micro SD memory card. For this function, Micro SD card can be formatted by pressing **Format Micro SD** in the menu of the memory usage screen.

8.2 Connect PC

【Menu】-> 【Tools & Setup】-> 【Connect PC】

(2)

Connect the phone to the computer by USB cable to complete material synchronization, picture, video clips and music file transmission.

If you have one Micro SD installed in E2831, you can connect PC as “USB Mass Storage” to make the Micro SD card to be used as USD disk.

Tips

The PC must be installed with **E2831 PC tool software(eZone)**: E2831 PC tool software is accompanied with the E2831 and provides the information exchange function between the mobile phone and the computer. Furthermore, it can provide the GPRS and CSD dial-up service. For the installation and use, refer to the user manual.

8.3 Bluetooth

You can use Bluetooth function to connect the phone to other devices that supports Bluetooth headset and support Bluetooth to complete material synchronization, picture, and music file transmission.

You can turn on or off the Bluetooth, search and connect new device, and connect last found device.

Note: Before searching to connect new Bluetooth device, make sure taht Bluetooth device in the “Pair” mode.

After you select one Bluetooth device you want to connect, you need to key in “passkey”. Please refer the user manual of that Bluetooth device for this “passkey” or maybe named PIN number.

(add pair screen).

8.4 Modem

【Menu】->【Tools & Setup】->【Modem】

E2831 can be used as a wireless modem. USB cable can be used to connect the E2831 with the computer, and then access the wireless network by GPRS/CSD.

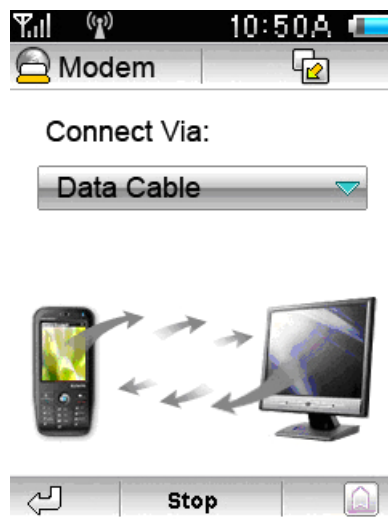

(3)

)

(4)

(5)

The PC must be installed with **E2831 PC tool software(eZone)** and the modem driver.

Tips

8.5 Alert

【Menu】 -> 【Tools & Setup】 -> 【Alert setup】

Set the alert type (Ring only/Vibrate only/Vibrate then Ring/Vibrate and Ring/Mute) and volume

Set the ring tone of call alert, message alert and calendar alert.

8.6 Device

【Menu】 -> 【Tools & Setup】 -> 【Device】

In the device settings , date and time, theme and sounds, auto power on /off, security, power save mode, screen brightness, backlight & auto lock, language, reset factory settings, user information an be set.

(6)

8.6.1 Date and Time

In the date and time settings, following function can be implemented:
