Gentlemen

Submitted herewith is an application for certification of a GSM module in the name of Wireless Monitor and Control Systems under FCC ID:T86AM120. This application is for a change in identity of a unit certified by Motorola Inc, FCC ID:IHDT56FV1 on December 21, 2005. There are no differences in the units other than FCC ID and the previous test results continue to apply to the new device. If there are any questions please contact Phil Inglis at 410 531 3439. This request is for a modular approval to permit the product to be installed in a GPS tracking system as well as future products.

Sincerely,

Phillip Inglis
Consultant to Wireless Monitor and Control Systems
