

Antenna Parameters

- 4M0.035.507 -

Calculation Formula of Partial Average Gain

$$\text{p. ave. gain} = 10 \log \left(\frac{\sum_{iPhi=0^{\circ}}^{360^{\circ}} \sum_{iTheta=60^{\circ}}^{90^{\circ}} G(iTheta, iPhi) \sin(iTheta)}{nPhi \sum_{iTheta=60^{\circ}}^{90^{\circ}} \sin(iTheta)} \right) = x \text{ dBi}$$

$nPhi \Rightarrow$ number of elevation cuts

$G \Rightarrow$ total gain ($G_{Theta} + G_{Phi}$)

$\text{p. ave. gain} \Rightarrow$ partial average gain

- angular ranges according to LAH.8V0.035.L V06F
- frequency bands according to LAH.8V0.035.L V06F

Monopole Antenna: 4M0.035.507

Measurement Setup

- measurement @ HCC anechoic chamber
- mounted on sirius ground plane
- monopole antenna screwed on ground plane

Monopole Antenna: 4M0.035.507

Partial Average Gain

partial average antenna gain (Theta=[60.00 - 90.00]° ; Phi=[0.00 - 360.00]°)
E_Total, Theta - linear w. spherical area consideration, Phi - linear

- min./max. → average over theta range
- ave. → average over theta & phi range

Monopole Antenna: 4M0.035.507

Partial Average Gain 2

partial average antenna gain (Theta=[60.00 - 90.00]° ; Phi=[0.00 - 360.00]°)
E_Total, Theta - linear w. spherical area consideration, Phi - linear

- min./max. → absolute value in theta & phi range
- ave. → average over theta & phi range

Monopole Antenna: 4M0.035.507

Partial Average Gain: Azimuth Plot

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

radiation pattern of the antenna
realized partial average gain (E_Total, Theta = [60.00 - 90.00]°)

Monopole Antenna: 4M0.035.507

Antenna Gain: Elevation Plot

radiation pattern of the antenna
realized gain (E_Total, Freq = 738.00 MHz)

radiation pattern of the antenna
realized gain (E_Total, Freq = 849.00 MHz)

radiation pattern of the antenna
realized gain (E_Total, Freq = 1462.90 MHz)

radiation pattern of the antenna
realized gain (E_Total, Freq = 1850.00 MHz)

radiation pattern of the antenna
realized gain (E_Total, Freq = 2170.00 MHz)

radiation pattern of the antenna
realized gain (E_Total, Freq = 2496.00 MHz)

Monopole Antenna: 4M0.035.507

Antenna Parameters

Monopole Antenna with PU

4M0.035.507

Theta = [60-90]°

Theta = [60-90]°

Theta = [0-180]°
