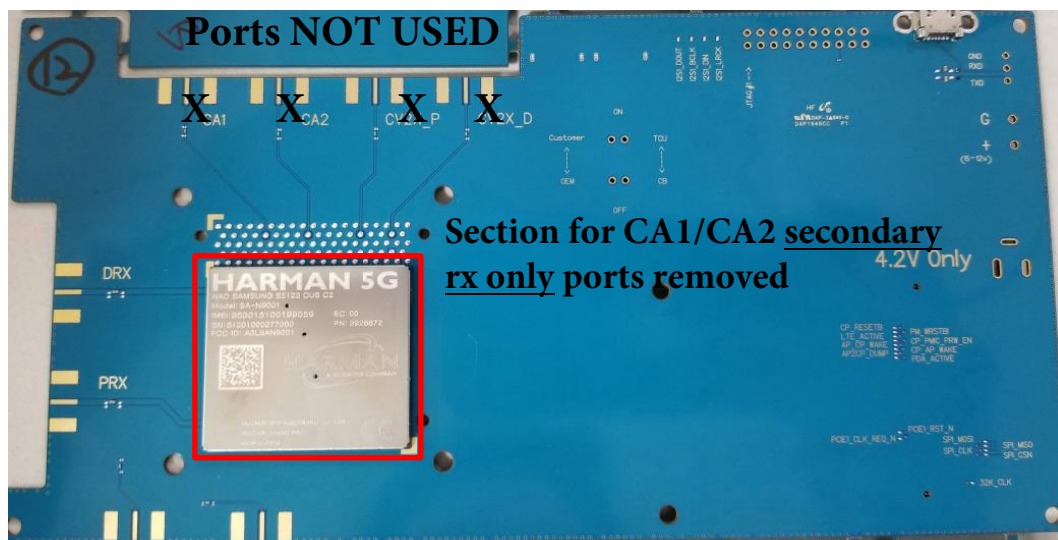

Figure 1.1-2 : SA-N9001 CUS D1

1.2 Description OEM vs Customer

- OEM NAD supports 4RX but Customer NAD supports only 2RX. TX section and primary RX is identical.
- Overall PCB size of the entire module is different due to removal of two RX only CA ports which are used to increase the data throughput on the parent product. The Transmitter section of the PCB and BOM is identical.
- Except above , everything is same.
