

Hello Tim,

Below is our replies upon your comment, please be advised.

1~4. Please refer to the updated exhibits uploaded.

5,7. Please refer to the updated test report re-done, that's already prepared under 15.249 per your suggestion.

6. Please refer to the updated Form 731 uploaded, I have made the correction on the freq range and the equipment class from DTS to DSS, FYI..

8. Okay

9. The final measurement is done by 1-axis of the operation (handheld Y-axis position) chosen from the worst-case in the pre-scan. FYI, both position (handheld or lay down position) are separately evaluated in the pre-scan. FYI.

10. Okay, please kindly remove the exhibit from the application folder, and we would be noted that not preparing such exhibit next time for the 15.249 job, thanks for your info.

11. Okay.

Thank you!!

Eric 0916
