Subject: RE: FCC ID: TAG-PN-80000

Suresh,

Sorry about the delay. Bart Hanlon is out of the office this week. I will be responsible for all regulatory filing issues on an ongoing basis. Please contact me with any questions.

Answers to your questions are:

1.) The FCC ID is: TAG-PN80000. This is as marked on the back of the unit. The Form-731 (see attached PDF) notes a Grantee Code: TAG and an Equipment Product Code: PN80000. I don't see the discrepancy could you please explain.

2.) I have attached a PDF of a new Letter of Agency that includes the FCC ID

3.) I have attached a PDF of a new Letter of Confidentiality that contains the short term confidentiality language.

Please let me know if any additional information is required.

Best Regards,
Eric

Hi Eric,
Here is the link to the FCC website where you can update your company info
<https://gullfoss2.fcc.gov/coresWeb/publicHome.do>

The link provides you telephone and email links for help. Please check with them how much it takes

You have not answered my earlier questions I am coping them for for you

1) What is the correct FCC ID of the device. TAG-PN80000 or TAG-PN-80000; FCC ID on the label does not match the one on the Form-731

> 2) Letter agency does not mention FCC ID.

> 3) You have requested that internal photos should be kept confidential. FCC requires additional justification for this. For example "special tools required" to open the device.

> The other option is, Internal Photos can be designated for short term

confidentiality (90 days) without additional justification.
> Please furnish additional justification or amend confidentiality
request letter and mail it to me.
>

Thanks,

Suresh,

We need to get the FCC filing completed ASAP. Therefore I am willing to keep the contact name as Mox Weber, if needed. How do we go about changing this in the future? Would it be possible to change this now? If so, then how long of a delay would it introduce?

Thanks,
Eric

Hi Eric,
I am asked send this to you as Mr. Bart Hanlon is not available.

In addition I have another piece of information for you.

If all the conditions are met the Grantee will be on the name of, Mr. Mox T Weber instead of Mr. Bart Hanlon. as per FCC only Mr. Mox T Weber will be recipient of the grant. See attached Extract from FCC Web site.
