

AAGH92 Treestand/Blind Locator

Setup and Use

1. Unscrew back of locator.
2. Install 3 “AAA” batteries. Be sure batteries are installed in the correct orientation.
3. Using the ring on back of locator light, hang the locator light in desired area.
4. To light the locator, push button on supplied remote within 100 yards of locator light.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

"This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."
