Dear Helen,

Re-Q#1: Attached please find the Block Diagram, FCC ID label format,  
Operational Description, Schematics, Cover Letter and Confidentiality  
Letter.

Re-Q#2: Yes. During this test, we use an IR remote controller (ex: DVD  
or  
VCR remote control) to produce an IR signal to IR sensor (EUT). The word  
"being released" means to release the bottom of IR remote controller.

Thanks for your help.

Best regards,

Joe Hsieh

Assessment NO.: AN05T4945, Notice#2

Question #1: Please submit Block Diagram, FCC ID label format,  
Operational  
Description, Schematics, Agent authorization Letter, Confidentiality  
Letter.

Please make sure Block Diagram includes 433MHz TX portion. Please make  
sure  
FCC ID label format contains FCC15.19 labeling requirement.

Question #2: This device is activated automatically upon receiving an IR  
signal. Please explain why the test report section 6.2 said "The  
transmitter  
is operated by manual and active time is 0.223s after being released."  
Please explain if any support equipment was ever used.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
