

Receiver part :

1. System power supply:7.2-Volt
2. Antenna and receiving diagram receive the controlling signal which matched the receivable frequency.
3. IC RX-2 drive the decode and control related component:Q3.Q4.Q5.Q9.F1

Transmitter part:

- 1.System power supply:12-volt
- 2.Press the TURBO, BACK, FRONT ,LEFT, RIGHT key to control Forward, Backward, Left or Right function of Helicopter.
- 3.IC TX-2 send out encode signal, enlarged by circuitry and carrier wave, transmitted by antenna and transmit circuitry.
