CONFIDENTIAL AND PROPRIETARY

The information contained in this document is the exclusive property of InnoSenT GmbH
and must not be disclosed by the recipient to third parties

The module ICP-705_F is a K-Band Transceiver working in the 24GHz frequency band.

1. It has its own RF shielding. Any additional shielding is not necessary to comply with Part 15 limits.
2. It has no direct modulation/data inputs. Programming can only be done by manufacturer
3. The input voltage of 24V will be transformed by an onboard power supply regulation.
4. The ICP-705_F has an integrated antenna, which is not removable.
5. The module will be labelled with its own FCC ID number.
6. The module is operating under the provision of section 15.245. The module fulfils all requirements. Results are shown in Test report No. XXXX
7. The module complies with any applicable RF exposure requirements.
