Re: FCC ID: TEB-HUNTSU825

To Whom It May Concern:

The following application is submitted on behalf of our client, Hunt Technologies, Inc., for evaluation of their model 0825 for certification under FCC Part 15.247.

The 0825 consists of a 900 MHz transceiver and a separate ZigBee transceiver on a single printed circuit board. This report specifically addresses the testing of the 900 MHz transceiver only. The 900 MHz circuit, operating in the 902-928 MHz frequency band, is a frequency hopping spread spectrum transceiver utilizing GFSK modulation.

The 0825 module collects metering data from the meter module and transmits it to electric utility companies. The module will be assembled into a Landis+Gyr S4e meter before delivery to the customer.

This class II permissive change is to include a 50kbps data rate (i.e. SUN Mode) and to address a change in the TCXO. The SUN mode 50kbps data rate replaces the Wide mode 76.8kbps data rate. The 0825 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,
