Re: FCC ID: TEB-HUNTSU864

To Whom It May Concern:

The following application is submitted on behalf of our client, Hunt Technologies, Inc., for evaluation of their model 0864 for certification under FCC Part 15.247.

Hunt Technologies' 0864 consists of a 900 MHz frequency hopping spread spectrum transceiver utilizing GFSK modulation, operating in the 902-928 MHz frequency band. The 0864 module will be assembled into a Landis+Gyr FOCUS AX meter before delivery to the customer. The 0864 module collects metering data from the meter module and transmits it to electric utility companies. It can also receive and repeat data from other similar modules or a central collector module.

This class II permissive change is to include a 50kbps data rate (i.e. SUN Mode) and to address a change in the TCXO. The SUN mode 50kbps data rate replaces the Wide mode 76.8kbps data rate. The 0864 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,
