Re: FCC ID: TFT-IDLMAX01

To Whom It May Concern:

The following application is submitted on behalf of our client, MaxID, for evaluation of their model iDLMax for certification under FCC Part 15.225. The iDLMax was tested to the full requirements of Part 15.225 with compliant results.

The iDLMax also contains three pre-approved modules which utilize separate antennas. The integrated modules consist of 802.11b/g, Bluetooth, and GSM/GPRS. All modules have single modular approval equipment authorizations and are identified as follows:

GSM/GPRS Module – FCC ID: IHDT56FV2
Bluetooth Module – FCC ID: QOQWT12
802.11b/g Module – FCC ID: TFT-W2SW0001

The iDLMax was evaluated for radiated intermodulation products for all possible simultaneous transmit configurations with compliant results. FCC KDB 341531 allows for a mobile RF exposure equipment classification therefore MPE calculations for simultaneous transmissions are also provided.

Sincerely,
