

## Test Setup Photo

Test Setup	Radiated measurement for below 1 GHz
A photograph showing a white rectangular test fixture on a turntable. The fixture is positioned in front of a large, white, grid-patterned anechoic chamber. A measurement horn antenna is mounted on a vertical mast, pointing towards the fixture. The floor is covered with black absorber panels.	
Test Setup	Radiated measurement for Above 1 GHz
A photograph showing a white rectangular test fixture on a turntable. The fixture is positioned in front of a large, white, grid-patterned anechoic chamber. A measurement horn antenna is mounted on a vertical mast, pointing towards the fixture. The floor is covered with black absorber panels. A blue circle highlights a specific area on the antenna setup.
